

# Innovative solutions for safer, smarter workflows

ADVANCING PRODUCTIVITY, SAFETY AND EFFICIENCY  
WITH INTEGRATED COMMUNICATIONS SYSTEMS

# Communications technology built for industry and backed by expertise

## EMPOWER DECISION MAKING AND MITIGATE RISK WITH MASTERCOM TECHNOLOGIES

Mastercom's integrated technology solutions turn data into actionable information for unique industry applications. Through the convergence of voice, vision and data, we enable business to meet present and future demands, keep people safe and achieve operational excellence.

Radio Frequency (RF) communication defined us and continues to differentiate our solutions. We boast the most experienced radio personnel across the full spectrum of talent including RF specialists, software developers and systems experts - who uphold our ethos as a communications visionary.

## EXPERTISE THAT SPANS DECADES

For more than 50 years, Mastercom has been providing communication solutions to essential workers in business and public safety. We pride ourselves on constantly pushing the boundaries, evolving with the changing environment and delivering cutting edge communication solutions which empower teams to be visible, connected and responsive.

# We Go Beyond – Our Integrations Make Businesses Flow

Solution design that unifies devices, networks, software and applications

## DIGITAL RADIO

Our unrivalled technical ability, deep industry knowledge and extensive state-of-the-art product range makes Mastercom a trusted provider of complete digital communications solutions.

## VIDEO MANAGEMENT SYSTEMS

Cutting edge AI-powered video analytics and CCTV allow you to analyse and share critical intelligence - enhancing situational awareness, enabling proactive incident response and improving operational efficiency.

## SOFTWARE & APPLICATIONS

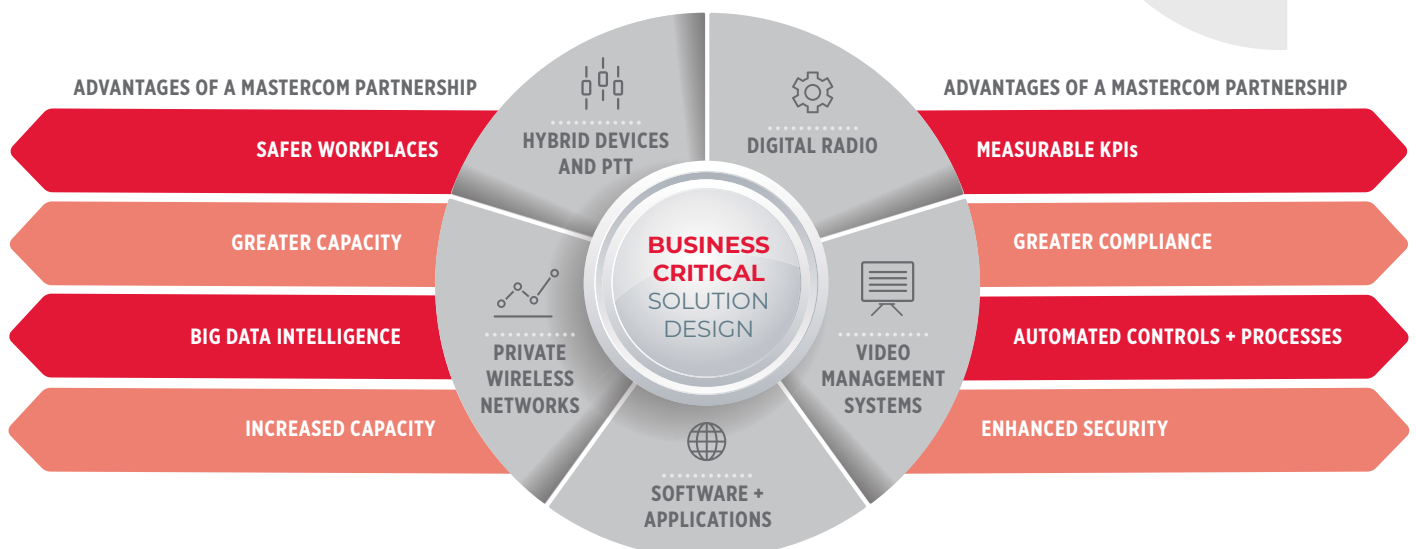

Our software is the glue that transforms devices and networks into actionable data for business analytics and reporting, connecting communications eco-systems to business systems.

## PRIVATE WIRELESS NETWORKS

Communications systems to meet unique operating and enhanced security requirements including custom built, point to point and SCADA networks, utilising Wifi, LoraWAN and BTLE technologies.

## HYBRID DEVICES AND PUSH TO TALK (PTT)

Multiple technology options to meet the needs of commercial and public safety users, including push-to-talk two-way communication via handheld devices, in-vehicle systems and fixed base stations.

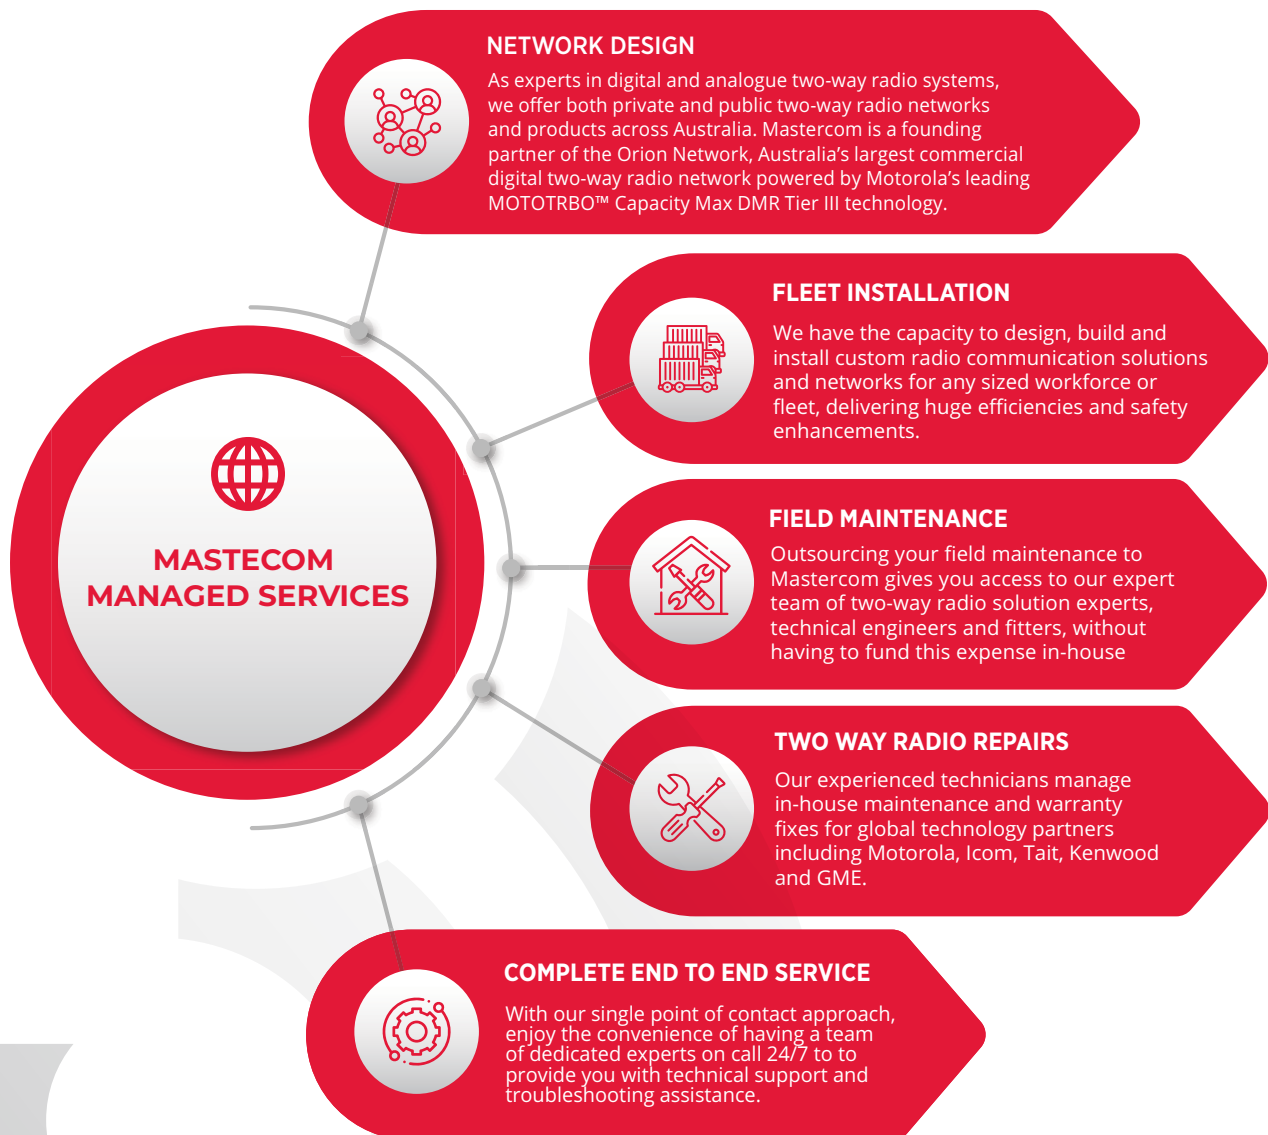

# Mastercom Managed Services

A well-managed radio communication system ensures optimal performance, minimising the risk of extended downtime or large capital outlay.

# Major Projects Undertaken by Mastercom

Whether you're operating across one or multiple sites, in high-risk environments or need to improve the performance and safety of your assets and personnel – our systems are up to the challenge.

**KEY BUS PUBLIC TRANSPORT SUPPLIER WITH TERMINALS INSTALLED ON THE ORION NETWORK INCLUDING VOICE, GPS, DURESS FUNCTIONS WITH TRBONET DISPATCH INTEGRATION**

**PRIVATE INFRASTRUCTURE BUILDS FOR DATA CENTRES, DISTRIBUTION CENTRES AND LOGISTICS HUBS**
